

Speeding-up climate-neutrality
with renewable gas

EBA AWARDS 2021 APPLICATIONS OPEN!

**The winners will be announced during the
gala dinner of the EBA Conference (26 October 2021)**

Biogas Cost Reductions

This award recognizes the effort of the applicant in developing innovations which lower the costs of biogas and biomethane production. The applied approach or technique, or combination of techniques, should be novel in a way as opposed to standard operation. The 'Biogas Cost Reductions' award will highlight initiatives from EBA members that have successfully implemented cost reduction innovations.

Who can be nominated?

- Projects which showcase innovations that lower production costs.
- Companies providing innovative technologies enhancing the reduction of production costs.

Biogas circularity

This award recognizes the role that biogas can play in the circular economy. The production of biogas and the by-products obtained from this process are an excellent example of recycling, recovery and re-use of resources. The 'Biogas circularity' award will highlight best practices from EBA members in demonstrating the greatest level of innovation to closing loops.

Who can be nominated?

- Projects which proof advanced integration of biogas in the circular economy.
- Companies providing options for the treatment of waste streams as biogas feedstocks and the production of biogas by-products.

Key biogas booster 2021

This award recognizes the efforts made by an individual or organisation in showcasing the positive social and environmental effects of biogas production and its multiple applications. The 'Key biogas booster 2021' award will acknowledge the individual work in highlighting the positive contribution of biogas in our society.

Who can be nominated?

Any individual making an outstanding contribution for the promotion of renewable gas.

Women leading the way to climate-neutrality

The biogas and biomethane sector is growing and with it, the presence of women in top management, engineering, research or farming positions. The 'Women leading the way to climate-neutrality' award is aimed at giving visibility to those brave women who are driving the energy transition, but also making gender equality in our sector a reality.

Who can be nominated?

Anyone identifying as a woman and working in the biogas sector as manager, researcher, engineer, consultant, farmer.

Top biogas young talent

This award recognizes a young individual in the renewable sector who has contributed significantly to the expansion and improvement of the biogas and biomethane sector. The 'Top biogas young talent' award will acknowledge a young talent who has stepped up and taken the lead on an initiative project that scale-up biogas and biomethane production.

Who can be nominated?

Any young individual between 18 and 35 years old.

How to submit your application?

Specify the award category chosen for your application:

- Biogas Cost Reductions
- Biogas circularity
- Key biogas booster 2021
- Women leading the way to climate-neutrality
- Top biogas young talent

Include the following applicant details:

- First name and name
- Position within the organization
- Organization
- Contact email
- Phone number

Include the following candidate details:

- Name of candidate/organisation
- Describe why your candidate should receive the EBA award for the category you have specified (max. 500 words)

Support your explanation with relevant data.

- Attachments in PDF format

Send your application at info@europeanbiogas.eu.

- Please include the following subject in your email: EBA awards 2021 AWARD CATEGORY - CANDIDATE NAME
- Deadline: Thursday 30 September 2021
