The background image shows a butterfly with orange and black wings perched on a purple flower in the foreground. In the background, there is a large industrial facility with several large cylindrical storage tanks and a building, likely a biogas plant. The sky is clear and blue.

**EBA welcomes diverse stakeholders
ready to grow the biogas economy.**

Our story

The European Biogas Association fully believes in the potential of renewable gas to achieve climate neutrality in Europe. Founded in 2009, the association gathers members committed to the scale-up of sustainable biogas and biomethane production and use throughout the continent.

We are a dedicated team of policy, technical and communication experts, **working together with our members to affirm the important role of the biogases in the European bioeconomy.**

WHAT?

The only European association representing the entire biogases value chain

WHO?

8,000 stakeholders*
from Europe and beyond

* Direct and indirect members

WHY?

Scaling-up production and use of biogases across Europe

Who's powering EBA's extensive network?

370 + members

50+ National Associations

300+ Corporate

20+ Research

"EBA serves as our advocate, promoting our positive impact on the community through green gas initiatives. Through these efforts, the association significantly contributes to achieving EU climate neutrality by 2050 by promoting our biomethane solutions."

Daniel Bauer, Head of Sales, BIOGEST

"EBA has played a pivotal role in tackling sector-specific concerns within a dynamic regulatory landscape. Moreover, EBA has been essential in enhancing the public perception of biomethane as a sustainable and effective way of combating global warming."

Cristina Avila, Founder & President, Verdalia Bioenergy

Meet the EBA Team in Brussels

Why join EBA?

Participate in strong advocacy for tangible results

Gain in-depth policy insights

Access exclusive market intelligence

Promote European innovation and know-how

Join the European biogas community

Take advantage of impactful communications

Access the EBA Member Platform

Why join EBA?

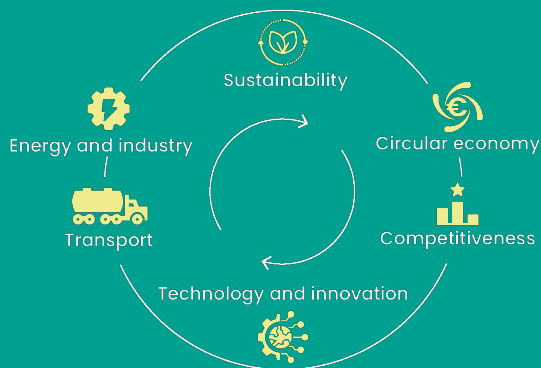

Participate in strong advocacy for tangible results

- Industry representation towards the European institutions and national governments
- Impactful events for and with policy makers
- Strategic alliances between industries

The advocacy starts here: join EBA's working groups

Sustainability WG deals with matters such as certification, requirements (GHG emissions savings, default values, sourcing policy, competing uses and cascading), methane emissions, negative emissions (BioCCUS).

Circular economy WG aims to develop a common understanding of the ways in which renewable gases from agricultural biomass, wastewater and other secondary raw materials can bring real benefits to the climate and environment. It also deals with nutrient recovery and the use of digestate.

Competitiveness WG focuses on understanding how different supportive market mechanisms work together in supporting investment in biogas and biomethane. It also considers which combinations of mechanism are most successful in achieving significant development of renewable gases. It also covers permitting, financing, and renewable gas trading.

→ **Associated active Task Force: Market instruments**

Technology and innovation WG focuses on topics related to gasification technologies, biohydrogen production, bioCO₂ valorisation, and manufacturing.

→ **Associated active Task Forces: Methanation, Gasification, BioCO₂**

Transport WG deals with general topics concerning the increase of biomethane use in transport, including the growing need for BioLNG for transport and HDV and related issues.

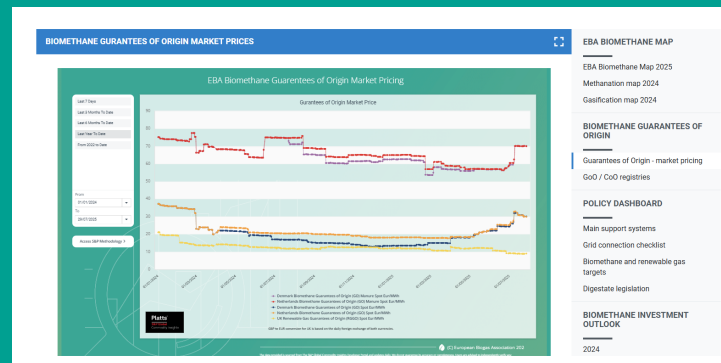

Energy and industry WG considers biogas and biomethane end uses (heat and industrial processes) and energy system integration.

Why join EBA?

Access in-depth policy insights and exclusive market intelligence

- Free access to the EBA Statistical Report – the biogases industry's reference document on the state of the biogases market
- Exclusive policy and regulatory analyses, members-only webinars, policy newsletter
- Members-only data stories: extended Biomethane Map, GOs daily pricing, and others

Why join EBA?

Promote European innovation and know-how

- Promotion of innovative technologies and processes through webinars, publications, presentations
- Access to knowledge-sharing between members
- Access to results of EU research projects

Why join EBA?

Join the European biogas community

- Access to the EBA member contact directory
- Networking opportunities during members-only Biogases Business Day and other EBA events
- Discount for participation in the European Biogas Conference and partner events
- Sponsorship and exhibition opportunities

Why join EBA?

Take advantage of impactful communications

- 34,000 social media followers
- 5,500 newsletter subscribers
- 190,000 website visitors
- 11 publications
- 12 press releases
- 10 events

Numbers for 2024

Why join EBA?

Access the EBA Member Platform

Your exclusive workspace for networking and knowledge exchange

- Working Groups and Task Forces documents
- Data stories (interactive maps, policy dashboards)
- Members-only resources: policy briefs, country schemes and statistical reports
- All editions of policy newsletters
- Members Directory
- Event discounts for members
